- OmniMD EHR PM / RCM
- Document Management
- Automated Faxing
- Eligibility Verification
- Lab Order System

Advanced Interventional Pain Clinic (AIPC) helps patients control the source of their pain and improve the quality of their lives. With their state-of-the-art equipment and highly trained doctors, they pinpoint the source of pain and treat it using a multitude of advanced techniques. Founded in 2008, AIPC not only treats and manages acute and chronic pain, but also offers addiction therapy for patients addicted to opiod pain medication.

Challenges

When **Dr. Padmaja R. Yatham** opened AI PC, she wanted to ensure they stayed focused on patients and not on managing paperwork, forms and billing. "Our staff does everything they can to keep patients happy and comfortable while under the treatment of our doctors," Dr. Yatham said. "That includes scheduling new patients within one to two days, seeing existing patients when it is most convenient for them, and reducing wait time by getting forms to patients before they come to their appointment."

Dr. Yatham decided to automate the workflow of the practice very early after opening. So she began searching for an integrated EHR and practice management/revenue cycle management solution which also included the forms and workflow for the pain management specialty.

Solution

AIPC chose OmniMD's EHR customized for pain management, OmniMD's practice management/revenue cycle management system, and additional services to make the workflow and billing faster and easier, including document management, automated faxing, eligibility verification, and a lab order system. The practice has found that OmniMD helps them provide better patient care.

Advanced Interventional Pain Clinic

Starting and Growing a Practice with an Integrated EHR Solution

Outcomes

- Automated workflow from the beginning
- Helps provide better patient care
- Ready for future growth

"Appointment scheduling, eligibility verification and billing all run smoothly," Dr. Yatham said. "And we find charting to be fast and comprehensive. All the forms and workflows we need for pain management are in the EHR."

Solution Continued

AIPC has grown to two locations and five providers. "Starting out with OmniMD and staying with it has helped us save money in overall practice operations as we grow," Dr. Yatham said. "Whenever we need help, response from support is timely. OmniMD delivers as promised."

OmniMD Specialty EHRs

OmniMD's Specialty EHR is a fully integrated EHR solution that is 2011 CCHIT® certified for Ambulatory EHR. Built with cloud-computing technology, it provides instant updates and reliable access, with the ability to connect online to labs, pharmacies and hospitals for less cost than hardware-based systems.
