Streamlined OB/GYN Office Workflow

Brooklyn Obstetrics and Gynecology Care is a busy OB/GYN practice seeing **200 patients per week**. Brooklyn Obstetrics and Gynecology Care have three providers and **10 support staff** who are focused on providing high quality patient care.

Practice Name

- Brooklyn Obstetrics and Gynecology Care P.C Brooklyn, NY

Organization Information

- 3 Providers
- 10 Staff
- 3 location
- 9000 Annual Patient Visits

Challenges

- Difficulty finding patient charts
- Problems finding lab reports and attaching to patient charts
- Many no-show patient appointments

Solutions

- OmniMD™ EHR
- Patient Reminder System

Challenges

Brooklyn Obstetrics and Gynecology Care wanted to enhance the delivery of high quality patient care without worrying about managing ever-increasing paper charts. They were also experiencing many no-show appointments and were having problems in tracking orders and results.

Solution

Brooklyn Obstetrics and Gynecology Care looked at many EHR systems before selecting OmniMD™ EHR for their busy practice. Dr. Dean Martin was looking for an easy, customizable, and OB/GYN focused EHR system that would make his office more efficient.

"With OmniMD™'s EHR, fast receipt of test results and ease of locating the results means improved communication with our patients," Dr. Martin said. "We are now able to create legible, thorough, and accurate customizable progress notes."

OmniMD™ EHR is designed for OB/GYN, which enabled fast implementation and easy learning at Brooklyn Obstetrics and Gynecology Care.

"OmniMD™ EHR was completely customized as per the needs of our practice. We can either do point-and-click, voice recognition or free text, to document any patient chart" said Dr. Martin.

OmniMD™ patient reminder system now calls patients in advance and has significantly reduced "no-shows" in the practice.

Dr. Martin has found that OmniMD helps his busy practice run more smoothly. OmniMD's complete EHR solution is **CCHIT Certified® 2011 Ambulatory EHR** and known for its ease of use, with a 5-star usability
